

Approvals and conformities

PMUC (French acronym for : Products and Equipments allowed for use in Powerplants by EDF - French Electricity Bo

MANUFACTURER: Babb Co (FR)

DESCRIPTION / APPLICATION(S):

Cleaner / remover with a high solvent power.

Primarily to wipe off the white background B104A and / or B102A (if necessary) used for magnetic testing. Can also be used as a degreasing agent prior to penetrant testing, although cleaner N120 is better or as a cleaner in general mechanics.

Companion products : White background B104A, B102A

DIRECTIONS FOR USE

To wipe off the B104A or B102A white background after magnetic testing, apply Safe 105 (by direct spray, impregnated clean rag or pre-impregnated wipes) and wipe with a rag, until the white layer disappears.

To clean a part, pour large quantities of **Safe 105** and wipe simultaneously with a clean cloth. The **Safe 105** evaporates quickly and leaves the part perfectly clean and clear of traces of lubricant, grease, oil, etc.

TECHNICAL CHARACTERISTICS

- Volatile, low toxicity product, offering a pleasant smell
- Non-chlorinated propelling agent
- Halogenous content < 200 ppm
- Sulfur content < 200 ppm

PRECAUTIONS FOR USE AND STORAGE

Transport / Handling: Refer to Material Safety Data Sheet (MSDS).

Storage : Keep away from moisture

Temperature range: 0°C à 50° C

Keep packaging closed after taking out some of the product
